

Research Collaborator

Research Collaboration on the effect of climate change on the microbial diversity in selected lakes/surrounding catchment areas in East Africa

A Team of Researchers from Embu University College, a constituent college of the University of Nairobi, Kenya is looking for collaborators from Tanzania, Ethiopia or Eritrea in the area of climate change, modelling, soil or aquatic biology.

They are developing a proposal on the effect of climate change on the microbial diversity in selected lakes/surrounding catchment areas in East Africa. Interested partners should be academic staff who have successfully supervised PhD and Masters students. Anyone interested can get in touch with Team for more details via mwirichia.romano@embuni.ac.ke.

More information is available in Directorate of Research.
